

In the Specification:

Page 7, replace the first paragraph, lines 1-9, with a new paragraph as follows:

- - Figs. 1-2 show a drilling head 1 according to the present invention which is completely formed of a hard material and ~~forms of a hard material~~ forms part of a rock drill for use with a hand-held power tool. The drilling head 1 has a main bit 2 and two diametrically opposite auxiliary bits 2a, 3b arranged symmetrically relative to the main bit 2 in radially outer region of the drilling head 1. The auxiliary bits 3a, 3b have, respectively arcuate, extensively axially rounded, edges 4a, 4b. The main bit 2 has two cutting edges 5a 5b which are connected at the drill tip by a top edge 6. Both auxiliary bits 3a, 3b have an arcuate length of about $\pi/4$ radian. - -.
